Deploy in kubernetes cluster

The screenshot shows the Kubernetes dashboard interface. The top navigation bar includes the Kubernetes logo, a dropdown menu set to 'default', a search bar, and user profile icons. The left sidebar lists various Kubernetes resources: Workloads (selected), Cron Jobs, Daemon Sets, Deployments, Jobs, Pods, Replica Sets, Replication Controllers, Stateful Sets, Service, Ingresses, Services, Config and Storage, and Config Maps. The main content area is titled 'Workloads > Deployments'. It features two charts at the top: 'CPU Usage' and 'Memory Usage', both displaying 'Waiting for more data to display chart...'. Below the charts is a table titled 'Deployments' with columns for Name, Images, Labels, and Pods. The table contains one entry: 'jobportal' with a status of 'Ready', a link to 'Show all' under Images, a link to 'Show all' under Labels, and '1 / 1' under Pods. The bottom of the image shows a Windows taskbar with the search bar, taskbar icons, and system tray information including temperature (27°C Cloudy), time (8:34 PM), and date (14-Nov-22).

Name	Images	Labels	Pods
jobportal	Show all	Show all	1 / 1
